Listening Practice Test 2

HOW TO USE

You have 2 ways to access the listening audio

1. Open this URL <https://link.intergreat.com/pGuym> on your computer
2. Use your mobile device to scan the QR code attached

Questions 1-3

Complete the notes below write **ONE WORD only** for each answer.

example	answer
information source :	<i>found in the brochure</i>
Included services	1 <input type="text"/> and accommodation
Sydney arrival date:	15 th of 2 <input type="text"/>
Accommodation criteria:	3 <input type="text"/>

Questions 4-6

Complete the form below.

Write **NO MORE THAN THREE WORDS OR A NUMBER** for each answer.

BOOKING INFORMATION

Room type:	4 <input type="text"/>
Credit card holder:	5 <input type="text"/>
Total cost for one night:	6 <input type="text"/>

Questions 7-10

Complete the sentence below.

Write **no more than TWO words** for answer.

The 7 is within walking distance of the accommodation

The customer books 8

Aboriginals stone carvings are in the 9

The Dreamtime can be experienced beneath the 10

Questions 11-15

Complete the Notes Below

Write **NO MORE THAN 2 WORDS OR A NUMBER** for each answer

Public Service broadcast

Volunteer workers must be at least 11 _____ years old

Job applicants should not have 12 _____

Job applicants are asked to submit 13 _____ and 14 _____.

The employer will pay the expenses of 15 _____ and phone calls.

Questions 16-20

Complete the table below

Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** for each answer

People need help	Duties	Requirement for volunteers	Service Time
Wheelchair users	Drive clients to scenic locations	- Excellent health - must own a First Aid certificate from the 16 _____	17 _____
The blind	Read books to blind people	- Read English clearly - No 18 _____ is an advantage	Monday mornings
19 _____	Take care of them on holiday	- have knowledge of basic first aid - good health - can elevate to a maximum of 20 _____	1 week in August

Questions 21-30

Complete the notes below

Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** for each answer

Environmental change Discussion

Agricultural work is having an 21 _____ effect on the environment.

Too much farming operation has caused a serious problem, which is called 22 _____.

Many places now seem to look like desert rather than 23 _____.

One proof the article had pointed out to show that things can hardly grow in some areas is the 24 _____.

The relation between the number of farmers and the acreage of woodland is 25 _____.

One reason for plants cannot grow is that the earth contains too much 26 _____.

Researchers have carried out a test to show the 27 _____ of the solution.

The possible range of salinity to grow plants is 28 _____.

The 29 _____ in Dr.Horst's books are useful and worth studying.

The student needs a 30 _____ to do his presentation

Questions 31-35

Complete the sentences below.

Write **NO MORE THAN TWO WORDS** for each answer.

Bees that help with pollination benefit flowers and 31 _____.

Bees produce wax that can be made into candles and 32 _____.

Dragonflies primarily eat 33 _____.

Insects in summer can be harmful because they can carry such deadly diseases as malaria, 34 _____ and sleeping sickness

Harmful insects may destroy crops, clothes, furniture, and even the 35 _____.

Questions 36-40

Complete the notes below.

Write **NO MORE THAN TWO WORDS** for each answer.

How to kill bad Insects

Chemical Method

These solutions to insect problems are often not worthwhile because:

- a) They are effective on a 36 _____
- b) They Can bring harm to 37 _____
- c) Insects become 38 _____ to the chemicals quickly.

Biological methods

These Methods are 39 _____ than chemical methods of eliminating harmful insects.

Breeding control method

In order to control the breeding of insects, one needs to understand the insects'

40 _____

Solution:

Part 1: Question 1 - 10

- | | |
|-----------------------------------|---------------------|
| 1 flights | 2 April |
| 3 cheapest/budget | 4 non-smoking |
| 5 John A. Smyth/John A Smyth | 6 110 dollars/\$110 |
| 7 Cultural Centre/Cultural Center | 8 camel ride |
| 9 desert | 10 stars |

Part 2: Question 11 - 20

- | | |
|-----------------------|---------------------------------|
| 11 18 | 12 police records |
| 13 references | 14 (recent) CV |
| 15 transportation | 16 Red Cross |
| 17 Tuesday afternoons | 18 foreign accent |
| 19 Disabled Children | 20 75/seventy-five pounds/75 lb |

Part 3: Question 21 - 30

- | | |
|------------|------------------|
| 21 adverse | 22 deforestation |
| 23 jungle | 24 soil samples |

25 inverse

27 ionisation/ionization

29 photographs

Part 4: Question 31 - 40

31 fruit trees

33 mosquitoes/mosquitos

35 (whole) building

37 humans

39 cheaper

26 saline

28 narrow

30 map

32 polish/ furniture polish

34 yellow fever

36 small scale

38 resistant

40 life cycle

SECTION 1

Woman: Good morning. I've been looking at your holidays to Australia in your **Example brochure**. I'm thinking of going during the second half of next month.

Man: Good morning. As you can see from our brochure, we offer a wide variety of packages to various destinations in Australia. Is there anything in particular that interests you?

Woman: Yes, my husband and I are very interested in the holidays in the Outback.

Man: These holidays are becoming increasingly popular. Would you like to arrange flights and accommodation with us, or just accommodation?

Woman: Can you arrange flights from Sydney?

Man: Certainly.

Woman: OK, **Q1 flights** and accommodation then.

Man: Right. You said that you wanted to travel next month. Which date would you prefer? I should point out that there are no daily flights available, so if you have a flexible itinerary, that's better.

Woman: Well, we arrive in Sydney on the 15th of **Q2 April** and we were thinking of travelling to the Outback on the 18th of August, er... I mean April.

Man: OK. There's only one flight from Sydney to Alice Springs on the 18th, so I'll book you on that. It leaves at 10 in the morning, which is quite convenient. Shall I book two seats for you?

Woman: Yes, please.

Man: As for your stay in the Outback, you can see from the brochure that we offer three packages - budget, standard, and luxury. The budget package is about 500 Australian dollars. The standard package is about 700 and the luxury one is approximately 1,000, though it does depend on exactly what you would like regarding extras. Which one would you prefer?

Woman: Well, we can't decide between the **Q3 budget** and standard options.

Man: Ah, well, actually, just looking at my computer here, on the date that you want to fly into Alice Springs, there is no standard accommodation available. It's fully booked, I'm afraid.

Woman: That's OK. We think that the **Q3 cheapest** one should be fine for us. We don't mind roughing it for a few days and we don't expect to be spending much time at the accommodation. We prefer the outdoors.

Man: Right. Let's look at the room options. First of all, would you prefer a **Q4 non-smoking** room?

Woman: Yes. Neither of us smokes.

Man: OK.

Woman: Oh, before I forget, could you book everything in my husband's name, please?

Man: Yes, of course. Are you paying by credit card?

Woman: Yes.

Man: In that case, I'll need your husband's name exactly as it appears on the card.

Woman: Of course. It's **Q5 John A. Smyth**. That's Smyth with a "Y".

Man: John ... middle initial "A"... surname Smyth, S-M-Y-T-H. Is that correct?

Woman: Correct.

Man: Thank you. I'll just check the price. The room will cost 100 dollars a night plus 10 dollars tax, so **Q6 110 dollars** per night in total. Is that OK?

Woman: Yes, that's fine. Book us for three nights, please.

Man: Most of the guests like to participate in some special activities and trips while they are staying in the Outback. Is there anything that interests you and your husband?

Woman: Yes, there are several things we'd like to see and do. We'd definitely like to visit the **Q7 Cultural Centre**.

Man: Yes, that's very popular. It's within walking distance of the accommodation and it's free. It's also a great place to pick up souvenirs of your trip.

Woman: We were thinking about visiting one of the nearby farms.

Man: There are two farms nearby - a sheep farm and a kangaroo farm. There is also an opportunity to ride camels in the desert. Have you ridden a camel before?

Woman: No, but it sounds like fun. Could you give me some more details about the kangaroo farm and the **Q8 camel ride**?

Man: Certainly. The kangaroo farm includes information on how the animals are raised whilst the camel ride provides information on desert flora and fauna. Which would you prefer? You can arrange to see the kangaroos in the wild if you like, rather than on a farm.

Woman: That sounds perfect. OK, we'll go on the camel ride and see the kangaroos in their natural habitat.

Man: OK. I'll arrange that for you. I forgot to mention that the journey also includes a stop at a place of aboriginal artwork. It's a place well-known for its stone carvings of animals and mythical creatures.

Woman: That sounds great! Are the carvings in the **Q9 desert**?

Man: Yes.

Woman: Wonderful!

Man: Well, that's perfect then. I'm sure you'll have a lovely trip, but remember that you need take care in the sun.

Woman: Yes. We're really looking forward to our trip. We really want to try to experience the Dreamtime under the **Q10 stars**.

Man: Of course. That's what a trip to the Outback is really all about.

Woman: Yes. Now, how about the cost...

SECTION 2

Continuing our broadcast of public service announcements, Worldwide Helpers announces upcoming vacancies for a number of volunteer worker positions. All applicants must meet the following requirements.

First of all, applicants must be over **Q11 18** years of age. The company apologises, but there can be no exceptions to this rule. Second, persons interested in these positions may not have **Q12 police records**. Minor traffic offences like a parking ticket are, of course, no problem. But, and I quote, "past and present drug users and sex offenders" need not apply. The employer will, of course, check with the police to verify your clean record.

In addition, applicants must supply **Q13 references** from past or present employers or teachers along with their recent **Q14 CV**. These references must testify as to the applicant's work habits and/or character. Remember, these are references from employers or teachers. A note from your dear old Mum won't do. Worldwide Helpers assures me that they will contact these references to confirm they are genuine.

Although all positions are volunteer, the employer will reimburse some of your expenses. For example, they will pay for **Q15 transportation** to and from the job site. Aside from that, the cost of phone calls is covered.

As for the positions themselves, there are three types. The first involves assisting persons confined to wheelchairs. For this position, volunteers must be physically fit and in excellent health. They must be able to lift at least 150 pounds. They should also have a current First Aid certificate from the **Q16 Red Cross**. But the most important requirement is that the volunteer must have his own car. On **Q17 Tuesday afternoons**, the volunteers take their clients to various scenic spots around the city to experience and enjoy nature.

If you don't drive, but you'd still like to get involved, the centre has a number of openings for people to read to the blind. Readers must, of course, read English clearly. Persons with no **Q18 foreign accent** are preferred. For these positions, you must be available on Monday mornings. Oh, wait, I see a note here. There is one opening for someone who can read Urdu. Apparently, there is a Pakistani blind person who'd like to hear his or her native language. But the other positions are all in English.

And finally, there are a limited number of volunteers needed to care for **Q19 disabled children**. I'm sorry, but the information I've been given does not say how many children or what disabilities they have. In any case, you are needed to care for the children for one week in August. Apparently, this will be at the close of the summer holiday. I would guess this involves helping them with the routine chores of daily life.

Again, volunteers for this position must know basic First Aid, be in good health, and be able to lift up to **Q20 75 pounds**.

OK, our next announcement is looking for someone to "facilitate" tiger breeding at the London Zoo. And, get this, it's a "strictly volunteer" position. That means you don't get paid! Oh my God... I'm sorry ladies and gentlemen, but I just have to laugh...

SECTION 3

DAVE: Are you just leaving the library now? I saw you get there at 8:00 a.m.!

PETE: Yeah, I've been there all day.

DAVE: What for? They hired a cute new librarian or something?

PETE: I wish. No, it's the presentation that I will give in Environmental Science the day after tomorrow.

DAVE: What's it about? I heard you were really excited about the class. And Dr Schnee also calls you for the "arcane" questions, as he calls them.

PETE: It's about environmental damage in the Yucatan.

DAVE: Excuse me, what? Or is that where?

PETE: Yucatan. It's a state in Southeast Mexico.

DAVE: So what's happening there?

PETE: Agriculture is having a really **Q21 adverse** impact on the environment. There are too many farmers doing too much farming. It's really destroying the forests and ruining the soil. Deforestation is a major problem there now.

DAVE: How did you learn about this? I don't recall Dr Schnee saying anything about it in

lecture.

PETE: Yes, but my brother went there last month, you know, to look at the old cities the Maya Indians built. That's what first got me interested.

DAVE: Your brother Tom?

PETE: No, Dick, Harry's twin. Anyway, he told me how few trees there were now and how much empty ground that grows almost nothing. He said the place looked more like the desert than **Q23 jungle** in some parts. It brought **Q22 environmental damage**. So I started looking for materials in the library. Here, look at this magazine.

DAVE: What's in it?

PETE: It's an old issue of "National Geographic". It includes interviews with tourists who've been there in the past few years. It's pretty bad. See the photos?

DAVE: I see the photos, but one or two photos don't prove anything.

PETE: Then read what the article says. Right there. The first thing it points out is how soil **Q24 samples** show it is hard for anything to grow there. It says how an area of 21,000 square kilometres has lost most of its forest in the past ten years. See, there are graphs. As the number of farmers increases, the acres of forest have decreased. It's an **Q25 inverse** relation.

DAVE: So how big is that state? I'm sorry, but I've never really learned the metric system.

PETE: It's bigger than the state of Massachusetts!

DAVE: That's shocking! Anything else?

PETE: There's lots of else. Scientists say there's a "growing area" of about 10.5 square kilometres where nothing can grow at all. It's like the beginning of a desert.

DAVE: Oh yes. What Dr Schnee called "desertification". But, why can't anything grow there? I've never really studied soil chemistry.

PETE: I'm just starting to look into that subject, but my sister Marie is a geologist and she says the problem is that the soil has too much **Q26 saline**, with no plants helping to adjust the chemistry. Apparently, that's a common problem with soil types throughout areas with rainforest. Once you lose the plant cover, it's difficult to bring it back. Reforestation is almost impossible, even if the land is not being used for other purposes.

DAVE: Wait a minute. What is "saline"?

PETE: Saline is salt dissolved in water. Scientists who've gone there have taken measurements. They do this by gathering a sample of the soil and running a simple test that shows the **Q27 ionisation** of the solution. The Geology Department in our own university has reviewed the soil at the site, too. They're right. It looks pretty bad. The level of salinity is going up. But the plants that would solve that problem can't be planted in soil like that. There is a **Q28 narrow**

spectrum of salinity in which the plants will grow.

DAVE: And once you pass the threshold, there is no way to put the problem right?

PETE: Exactly. It's possible that no one can do anything to stop the trend now. All because of human greed! I...

DAVE: Wait a second. How do you know these "scientists" can be trusted? What kind of reputation do they have? Are they reliable?

PETE: Oh they're definitely reliable. They include four members of the faculty from the Geology Department right here at MIT. Here, study these **Q29 photographs** and check the damage yourself. That's what Dr Horst who wrote this book here did. He's newly appointed, but Dr Schnee says he's brilliant.

DAVE: So, where are you going now?

PETE: I'm headed over to the Geography Department to borrow a **Q30 map** for my presentation. You know, this whole problem could have been avoided! The farmers there in the Yucatan...

DAVE: Uh, Pete??

PETE: What?

DAVE: Go take a break! Leave some studying for the rest of us.

SECTION 4

Good afternoon, and welcome to Insect Biology 101. I'd like to begin this course with a few remarks about good insects and bad ones. Bugs are all around us and that's both a benefit and an annoyance - sometimes maybe even serious harm. First, let's talk about the good things that insects do for us.

Probably the most important insect for humans, and maybe for all other life, is the bee.

Q31 Bees help plants in the process of pollination, and thus are necessary to most flowers and fruit-producing trees. That is, they carry pollen from "male" flowers to "female". If it weren't for bees, we'd have very few food plants and no fruit either. In fact, there would be no "we". No less a thinker than Albert Einstein pointed out that, without bees, humanity would be dead within a year or less. We'd starve. It's that simple. That should maybe make us just a little humble.

A little less dramatic is the fact that bees also make the honey we eat. **Q32** Moreover, they produce beeswax, which is useful in candles and it's also used as a first-rate furniture polish.

Sure, these may not be vital to our lives, but they can serve as reminders of how important bees are. That's a point I keep coming back to in this course. Though, in all fairness, I should point out that butterflies aid in pollination as well as bees.

[Access https://ieltsionlinetests.com](https://ieltsionlinetests.com) for more practices

Now, here in Michigan, what's the worst part of summer? Yep, that's right - mosquitoes. But I'm talking about helpful insects, right? So let's look at the dragonfly first. If there were no dragonflies, there would be even more mosquitoes! Dragonflies mainly eat **Q33 mosquitoes** and also a few other insects. Yes, that's right. They don't just fly around, and they also help to eliminate harmful insects. So, the next time you see a dragonfly, don't you dare kill it!

Now let's talk a little about those harmful insects. Take the mosquitoes I just mentioned as an example. Not so many years ago, mosquitoes here in America weren't just annoying. Some were even deadly. They carried malaria and **Q34 yellow fever**. My own ancestor, the Confederate General John Bell Hood, lived through the worst battles of Civil War only to die at age thirty-eight from yellow fever. A pest, not a bullet!

Well, besides the mosquitoes, in summer there is also a kind of insect that never seems tired. Right, that is the fly. Before I go on talking, I must mention an African fly called the Tsetse fly, which feeds on blood and can cause serious diseases in the people and animals that it bites. Besides, it is still a bearer of sleeping sickness, which affects around 300,000 people every year in Africa and can be treated only with toxic drugs that are hard to administer. Worse still, the drugs sometimes don't work.

Other insects, of course, destroy food crops. In China, for instance, locusts continue to be a danger to the harvest in some areas. Less important, but still annoying, moths eat people's clothes and dust mites slowly destroy carpets. Worse, but still in the home, termites or "white ants" eat wood - the wood of your house. If they are not stopped, they can eventually destroy the **Q35 whole building**. Usually they seriously damage a building before anyone even notices them. So, as we all know, insects can be a real trouble.

For some decades in the West, to kill insects with chemicals seemed a good remedy. Unfortunately, chemicals can only be used in a limited area for a limited time. It's a **Q36 small-scale** solution. The insects come back. Worse still, some of the poisons used like DDT were found harmful to the environment. Many kinds of wildlife, like hawks, were harmed. And people in chemical-using rural areas have one of the highest rates of liver cancer in the world. It's no secret that the chemicals remain harmful to **Q37 humans**.

Like all species, insects adapt to their changing environments at an amazing rate. When a new chemical is introduced to their habitat, the insects that survive are generally the ones with some way of resisting the harmful effects. They then breed with the other survivors, and just like that insects become **Q38 resistant** to most poison in a few generations. An insect generation, remember, is a couple of months at most!

So, again we have to ask: what to do? Well, there are biological solutions. Some of these are pretty simple. One is destroying the insects' habitat. You take away their home or food. Cleaning your kitchen is the best way to prevent roaches. No garbage: no food. Getting rid of marshes and swamps eliminates mosquitoes. Other solutions might include bringing in dragonflies or bats in areas where mosquitoes are many. This is a **Q39 cheaper** alternative to [Access https://ieltonlinetests.com](https://ieltonlinetests.com) for more practices

chemicals. Biological methods like this also bring no extra pollution to the environment. But you have to be careful. If you change the environment too much, you might be hurting other forms of life accidentally.

One recent method of controlling insect populations involves interrupting their breeding cycle. What does that mean? It means "birth control for bugs". Insects are provided with food that makes them unable to reproduce. Since they can't have babies, the population disappears, or nearly so. And since no young are born, resistance is not a problem with no young insects developing increased resistance.

Interrupt the **Q40** life cycle, eliminate the bug! It's clear that we must have an understanding of the life cycle of the insect. At least, that's the plan. We'll go into more details as this course goes along. Now I will stop here to see whether you have any questions or not.
